

PITOT CHANGE-OUT KIT

USER GUIDE

Item#: PCK

OVERVIEW

The Pitot Change-out Kit simplifies the job of changing out a Hose Monster pitot. The $\frac{1}{8}$ " hex socket tool is used so that removing, installing and adjusting the setscrew is done with ease. The magnet is used to keep from losing the ball, spring, pin, and setscrew.

COMPONENTS

- $\frac{1}{8}$ " x 6" long hex wrench with $\frac{1}{4}$ " socket drive
- Rectangular ceramic magnet

INSTALLING THE PITOT

Refer to the user guide included with the Pitot Replacement Kit (Item#: HMP) or Pitot Rebuild (Item#: HMPR).
