This device is FM Approved

The pressure vs. flow rate data developed within this flow chart is based on the average K-factor measured during laboratory testing. This data has been determined to be within the acceptable limitations for accuracy.

It is the user's responsibility to verify that the correct chart and column is being used.

• **2 1/2"** Use this column if the Hose Monster is used without a nozzle insert. The built-in pitot must be installed for accuracy.

• **1 3/4"** Use this column if the Hose Monster is used with a 1 3/4" nozzle insert installed (#HMNI1.75). The built-in pitot must be installed for accuracy.

• **1 1/8"** Use this column if the Hose Monster is used with a 1 1/8" nozzle insert installed (#HMNI1.125). The built-in pitot must be installed for accuracy.
